

LAK 2017

WELCOME TO HEIDELBERG! ¡BIENVENIDOS A HEIDELBERG! WILLKOMMEN IN HEIDELBERG!

We cordially invite you to the 24th Latin American Colloquium, LAK 2017, which will take place April 5 – 8, 2017, in Heidelberg, Germany.

Again, we intend to bring together researchers from all fields of Earth Sciences and interdisciplinary initiatives and present an attractive program on the geological evolution of Central America and the South American continent and its margins, processes of mountain building, uplift and erosion as well as interaction between tectonic and climatic parameters. We also invite contributions from related topics such as geomorphology, geoarchaeology, palaeontology, natural resources, geohazards, and economic geology. Due to the German-Mexican year of science 2016/2017, contributions addressed to Mexico are particularly welcome.

The name of Heidelberg stands for a unity of history and modernity. Our world-famous castle, the beautiful historic city center and Germany's oldest university which today is a modern scientific location of international reputation, come along with a lively and varied cultural scene.

We are looking forward to welcoming you in Heidelberg!
